Message from the CFO

We have suffered enormous losses [as a result of the COVID-19 pandemic], but our goals for excellence, access, and affordability are as important as ever, and we will press forward to realize our mission despite this turmoil.

We must remain singularly focused on our mission and come together as responsible stewards of university resources... [to] move the university into a more financially stable position in the coming years.

Exercising good judgment and following the newly released discretionary spending guidance... will require a strategic shift in mindset around purchasing decisions by everyone and will lead to better ways to manage spending and realize savings without sacrificing quality or timeliness of goods and services that are truly needed.

I ask for your support of financial leaders and their staff in the Chancellor-led units and in the central administration units; these people will have to make difficult decisions to ensure that we save for our future together...

Rutgers University is implementing spending controls to reduce the budget gap and return to a more financially stable position in years to come.

President Holloway, the Chief Financial Officer, Cabinet, Chancellors and Vice Chancellors, Administrative Council, and university senior leaders support this approach.

All departments, faculty, and staff must shift mindset and exercise sound judgment with a continuous commitment to fiscally responsible spending.

Discipline applies to purchases from all funding sources. We are not saying, “Do not spend.” We are asking to spend wisely.

Discretionary Spending approvers perform additional due diligence to ensure purchases are necessary, appropriate, and reasonable.

Securing the lowest price is important. Also consider shipping, customer support, product quality, warranty, delivery time, return policy, contract-level rebate, and discounts.

Continuous monitoring and availability of spending reports are in place to review with senior leaders universitywide.
